2. Terminate the Wi-BOX

If you haven't turned off power to the monitor be careful not to short any of the individual cables with each other as this might cause the system to fail.

If you are not feeding the cabling through the rear you may have to cut out a bit of the plastic to create a pathway for the cabling through the front.

Terminate the cabling in the same ports as the current wiring

Minimum requirement;
 + (Wi-BOX red) to connector +
 L (Wi-BOX yellow) to connector L
 – (Wi-BOX brown) to connector –

For video add the following;
 V (Wi-BOX blue) to connector V
 M (Wi-BOX black) to connector M

Optional;
 Ct (Wi-BOX green) to connector Ct
 F1 (Wi-BOX white) to connector F
